

Behind the Design

Finally sign and banner installers have a system specifically designed to attach signs and banners to chain link fences and posts. SignGrabber's patent pending designs allow safe, attractive, and tamper-resistant installation of signs and banners that are superior to any solution you have used before.

This patent pending design helps prevent theft of your sign or banner and is much safer than conventional mounting methods. The slotted bolt openings securely lock the bolt in place while allowing accurate alignment of any size sign.

Safety & Security

Traditional "Handyman" sign and banner mounting methods are unsafe, insecure, and with protruding hardware, a potential legal liability!

With SignGrabber, your signage will not only be safer and more secure, but it will look cleaner and last longer. The sturdy metal anchors fit snugly preventing movement from wind, child tampering, or vandalism.

Safe, proven tamper-resistant bolts have a specially designed head that makes installation easy, but removal almost impossible for vandals.

Features & Benefits

- Fits standard 2" and 1.25" chain-link fences
- Made of sturdy die-cast metal
- Tamper-resistant hardware
- Flush mounts for safety
- Economical

Potential Markets

- Little League ball fields
- City & State property
- Universities
- Industrial Sites
- Residential Property

SIGNGRABBER MODELS

SignGrabber 2

SignGrabber 2 is our flagship product. The sturdy, cast metal mounting unit fits snugly into the diamond shaped hole of 2" industry standard chain link fence, and with the included one-way security bolt attaches your sign or banner securely. The three-way adjustable, slotted design allows perfect alignment for signs of any size or shape, and the recessed nut retaining system makes single-handed installation quick and easy!

SignGrabber 1

SignGrabber 1 is a mounting system for 1.25" fabric fence, often used for pool enclosures and secured areas. The unit fits snugly into the diamond shaped hole of 1.25" fabric chain link fence, and with the included one-way security bolt attaches your sign or banner securely. The recessed nut retaining system is secure and extra-safe in high traffic areas.

SignGrabber P

SignGrabber P is a mounting system for post mounted signs. It has been designed for mounting signs to formed metal poles with regular spaced holes (U-channel and square sign posts). Used with one-way bolts they act as a non-removable nut, thus adding tamper resistance to the installation. The cast alloy used will not rust.
